

Cross Island Parkway (US 278) Toll Conversion Project

Project Recap

The scope of the project was finished by the original completion date of November 30th, 2022. Punch list items are being completed this week to include removing traffic barrels and silt fence. Final grassing touch ups to take place beginning next week. These changes will greatly improve the aesthetics of the project as a whole.

Current Phase

Furthermore, additional scope of work was added to repair sealed bridge joints on all bridges throughout the project, including the Broad Creek Bridge and the Charles Frasier Bridge. This work will be paired with new pavement markings along the bridges to heighten visibility.

For project information, including questions, please contact the SCDOT Special Projects Construction office at (843) 953-2697, or visit our website at crossislandparkway.org.
